SauceDemo – Manual QA Testing Portfolio Project

Self-Directed Project

Dakota Adams

Test Plan

Overview

This project focuses on SauceDemo (Swag Labs), a software testing demo site operated by Sauce Labs that simulates a fictional e-commerce store “Swag Labs”. The purpose of this project is to verify the functionality of SauceDemo’s login, cart, checkout, and product sorting.

Scope

In Scope

- Login
- Shopping Cart / Add to Cart
- Checkout
- Product Sorting

Out of Scope

- Hamburger menu
- Footer

Test Objectives

- Verify that users can log in with valid credentials and are denied access with invalid credentials.
- Verify that products can be added to, updated in, and removed from the shopping cart correctly.
- Verify that users can successfully complete checkout with valid information and cannot complete checkout with invalid information.
- Verify that users can sort products based on the selected criteria.

Test Approach

Black-box manual testing using test cases and session-based exploratory testing of in-scope areas/features.

Test Environment

- Operating system: Windows 11 Home
- Device: Desktop PC

- Browser: Chrome

Test Schedule

Activity	Planned Start Date	Planned End Date	Actual Start Date	Actual End Date	Status
Test Plan	8/24	8/30	8/24	8/30	Completed
Test Case Design	8/31	9/15	8/31	9/21	Completed
Test Case Execution	9/15	9/22	9/22	9/29	Completed
Exploratory Testing	9/23	9/30	9/30	10/5	Completed
Bug Reporting	10/01	10/08	10/6	10/16	Completed
Test Completion	10/17	10/24	10/19	10/28	Completed

Exit Criteria

- All test cases have been executed.
- All in-scope areas have been tested.
- All identified bugs have been documented.

Test Cases

This document contains manual test cases for verifying SauceDemo's login, shopping cart, checkout process, and product sorting functionality.

Test Case ID: TC_LOGIN_001	
Field	**Details**
Test Objective	Verify that users can log in with valid credentials and are denied access with invalid credentials.
Title	Verify successful log in with valid credentials
Preconditions	The user is on the login page.
Test Data	• Valid usernames: standard_user, problem_user, performance_glitch_user, error_user, visual_user • Valid password: secret_sauce
Test Steps	1. Enter a valid username. 2. Enter the valid password "secret_sauce" 3. Select Login. 4. Click the hamburger menu and select "Logout" to return to the login page. 5. Repeat Steps 1-3 for each of the 5 valid usernames.
Expected Result	Each valid user is successfully logged in and taken to the Product Listing Page (PLP).
Actual Result	Each valid user is successfully logged in and taken to the PLP.
Status	PASS

Test Case ID: TC_LOGIN_002	
Field	**Details**

Test Objective	Verify that users can log in with valid credentials and are denied access with invalid credentials.
Title	Verify login is denied with an invalid username and invalid password.
Preconditions	The user is on the login page.
Test Data	• Invalid username: invalid_user • Invalid password: invalid_password
Test Steps	1. Enter the invalid username. 2. Enter the invalid password. 3. Select Login.
Expected Result	Login is denied and an appropriate error message is displayed.
Actual Result	Login is denied and “Epic sadface: Username and password do not match any user in this service” error message is displayed.
Status	PASS

Test Case ID: TC_LOGIN_003	
Field	**Details**
Test Objective	Verify that users can log in with valid credentials and are denied access with invalid credentials.
Title	Verify login is denied with an invalid username and valid password
Preconditions	The user is on the login page.
Test Data	• Invalid username: invalid_user • Valid password: secret_sauce
Test Steps	1. Enter the invalid username. 2. Enter the valid password. 3. Select Login.
Expected Result	Login is denied and an appropriate error message is displayed.

Actual Result	Login is denied and “Epic sadface: Username and password do not match any user in this service” error message is displayed.
Status	PASS

Test Case ID: TC_LOGIN_004	
Field	**Details**
Test Objective	Verify that users can log in with valid credentials and are denied access with invalid credentials.
Title	Verify login is denied with valid usernames and invalid password.
Preconditions	The user is on the login page.
Test Data	• Valid usernames: standard_user, problem_user, performance_glitch_user, error_user, visual_user • Invalid password: invalid_password
Test Steps	1. Enter a valid username. 2. Enter the invalid password. 3. Select Login. 4. Repeat Steps 1-3 for all valid usernames.
Expected Result	Login is denied and an appropriate error message is displayed for each valid username.
Actual Result	Login is denied and error message “Epic sadface: Username and password do not match any user in this service” is displayed for each valid username.
Status	PASS

Test Case ID: TC_CART_005

Field	Details
Test Objective	Verify that products can be added to, updated in, and removed from the shopping cart correctly.
Title	Verify that clicking the “Add to Cart” button adds the selected item to the shopping cart and updates the cart item count correctly.
Preconditions	• The user is logged in as standard_user. • The user is on the PLP. • The shopping cart is empty.
Test Data	Sauce Labs Backpack, Sauce Labs Bike Light, Sauce Labs Bolt T-Shirt, Sauce Labs Fleece Jacket, Sauce Labs Onesie, Test.allTheThings() T-Shirt (Red)
Test Steps	1. Click “Add to Cart” on each product.
Expected Result	All 6 products have been added to the shopping cart, and the cart item count is now 6.
Actual Result	All 6 products have been added to the shopping cart, and the cart item count is now 6.
Status	PASS

Test Case ID: TC_CART_006	
Field	**Details**
Test Objective	Verify that products can be added to, updated in, and removed from the shopping cart correctly.
Title	Verify that clicking the “Remove” button removes the selected item from the shopping cart and updates the cart item count correctly.
Preconditions	• The user is logged in as standard_user. • The user is on the PLP. • The user has one instance of each product in the shopping cart.

Test Data	Products: Sauce Labs Backpack, Sauce Labs Bike Light, Sauce Labs Bolt T-Shirt, Sauce Labs Fleece Jacket, Sauce Labs Onesie, Test.allTheThings() T-Shirt (Red)
Test Steps	1. Click “Remove” on each product.
Expected Result	All 6 products have been removed from the shopping cart, and the cart item count is now 0.
Actual Result	All 6 products have been removed from the shopping cart, and the cart item count is now 0.
Status	PASS

Test Case ID: TC_CART_007	
Field	**Details**
Test Objective	Verify that products can be added to, updated in, and removed from the shopping cart correctly.
Title	Verify cart persistence after logout and subsequent login.
Preconditions	• The user is logged in as standard_user. • The user is on the PLP. • The user has Sauce Labs Backpack in the shopping cart.
Test Steps	1. Click the hamburger menu and select “Logout”. 2. Log in. 3. Navigate to the shopping cart page.
Expected Result	The cart contains the same product as before logout.
Actual Result	The cart contains the same product as before logout.
Status	PASS

Test Case ID: TC_CHECKOUT_008	
Field	**Details**
Test Objective	Verify that users can successfully complete checkout with valid information and cannot complete checkout with invalid information.
Title	Verify successful checkout with valid customer information.
Preconditions	● The user is logged in as standard_user. ● The user has a product in the shopping cart. ● The user is on the Checkout page.
Test Data	● First Name: Dakota ● Last Name: Test ● Zip/Postal Code: 60451
Test Steps	1. Enter the First Name, Last Name, and Zip/Postal code. 2. Click the “Continue” button. 3. Click the “Finish” button.
Expected Result	The order is successfully completed and the order confirmation page displays the appropriate success message.
Actual Result	The order is successfully completed and the order confirmation page displays “Thank you for your order! Your order has been dispatched, and will arrive just as fast as the pony can get there!”
Status	PASS

Test Case ID: TC_CHECKOUT_009	
Field	**Details**

Test Objective	Verify that users can successfully complete checkout with valid information and cannot complete checkout with invalid information.
Title	Verify unsuccessful checkout with blank customer information.
Preconditions	• The user is logged in as standard_user. • The user has a product in the shopping cart. • The user is on the Checkout page.
Test Data	• First Name: (blank) • Last Name: (blank) • Zip/Postal Code: (blank)
Test Steps	1. Leave the First Name, Last Name, and Zip/Postal code fields blank. 2. Click the “Continue” button.
Expected Result	An error message indicating that required information is missing is displayed, and the user cannot proceed to the subsequent checkout step.
Actual Result	The “Error: First Name is required” message is displayed, and the user is prevented from proceeding to the subsequent checkout step.
Status	PASS

Test Case ID: TC_CHECKOUT_010	
Field	**Details**
Test Objective	Verify that users can successfully complete checkout with valid information and cannot complete checkout with invalid information.
Title	Verify unsuccessful checkout with nonblank invalid customer information.
Preconditions	• The user is logged in as standard_user. • The user has a product in the shopping cart. • The user is on the Checkout page.

Test Data	• First Name: 12345 • Last Name: 12345 • Zip/Postal Code: ABC@
Test Steps	1. Enter invalid inputs in the First Name, Last Name, and Zip/Postal Code fields. 2. Click the “Continue” button.
Expected Result	An appropriate validation error is displayed, and the user cannot proceed to the subsequent checkout step.
Actual Result	No error message is displayed, and the user can proceed to the subsequent checkout step.
Status	FAIL

Test Case ID: TC_SORT_011	
Field	**Details**
Test Objective	Verify that users can sort products based on the selected criteria.
Title	Verify that the “Name (A to Z)” sort option sorts products in A to Z order.
Preconditions	• The user is logged in as standard_user. • The user is on the PLP.
Test Steps	1. Select the “Name (A to Z)” sort option.
Expected Result	The products are listed in A to Z order.
Actual Result	The products are listed in A to Z order.
Status	PASS

Test Case ID: TC_SORT_012	
Field	**Details**
Test Objective	Verify that users can sort products based on the selected criteria.
Title	Verify that the “Name (Z to A)” sort sorts products in Z to A order.
Preconditions	• The user is logged in as standard_user. • The user is on the PLP.
Test Steps	1. Select the “Name (Z to A)” sort option.
Expected Result	The products are listed in Z to A order.
Actual Result	The products are listed in Z to A order.
Status	PASS

Test Case ID: TC_SORT_013	
Field	**Details**
Test Objective	Verify that users can sort products based on the selected criteria.
Title	Verify that the “Price (low to high)” sort option sorts products in low to high price order.
Preconditions	• The user is logged in as standard_user. • The user is on the PLP.
Test Steps	1. Select the “Price (low to high)” sort option.
Expected Result	The products are listed in low to high price order.
Actual Result	The products are listed in low to high price order.
Status	PASS

Test Case ID: TC_SORT_014	
Field	**Details**
Test Objective	Verify that users can sort products based on the selected criteria.
Title	Verify that the “Price (high to low)” sort option sorts products in high to low price order.
Preconditions	● The user is logged in as standard_user. ● The user is on the PLP.
Test Steps	1. Select the “Price (high to low)” sort option.
Expected Result	The products are listed in high to low price order.
Actual Result	The products are listed in high to low price order.
Status	PASS

Exploratory Testing

This document contains test session sheets documenting session-based exploratory testing of SauceDemo's login, shopping cart, checkout process, and product sorting functionality.

Test Session Sheet 01 - LOGIN

Test Charter - Explore login behavior, focusing on *unusual inputs* and *authentication behavior*.

Timebox - 60 minutes

Session notes

- After an unsuccessful login attempt, the error icon overlaps with the password visibility icon. Clicking the error message's "X" removes the error icon, but the password visibility icon remains unavailable for subsequent attempts.
- Username and password fields have no apparent character limit (tested by pasting approximately 215k characters).
- The login session expires after a period of inactivity
    - Observed on cart.html and checkout-step-one.html.
    - After expiration, interacting with an interactive element logs the user out.
    - Error message: "Epic sadface: You can only access '/checkout-step-one.html' when you are logged in."
    - Refreshing or hard-refreshing the page does not immediately log the user out.
- After logging out, protected pages cannot be accessed. However, using the browser's Back and Forward buttons or closing and reopening the tab may allow access to a previously viewed protected page.
    - Potential defect in session or authentication handling.
    - Reproduced by logging in, clicking Back, then clicking Forward.
- No apparent restriction on repeated unsuccessful login attempts.
    - Potential security concern: may increase vulnerability to brute-force attacks.

Findings

- The password visibility icon becomes unavailable after an unsuccessful login attempt.
- Username and password fields have no apparent character limit.
- The login session expires after a period of inactivity.
- Previously viewed protected pages may remain accessible through browser navigation without explicitly signing out.
- No apparent restriction on repeated unsuccessful login attempts.

Test Session Sheet 02 - CART

Test Charter - Explore cart behavior, focusing on the *Add to cart* and *Remove features*, as well as *cart contents*.

Timebox - 60 minutes

Session notes

- Unable to increase an item's quantity. The QTY field appears editable but is not interactive.
- Ctrl-clicking the cart link does not open the cart page in a new tab, although Ctrl-click works on other links on the site.
- Users can access checkout and complete an order with an empty cart.
- The description label on the cart page is unusually positioned.
- The Sauce Labs Onesie product description contains a possible typo: “hemmed sleeved and bottom.”
- The product-name hyperlink’s hover area extends beyond the product’s text, making the product name more difficult to select and copy.
- The cart page does not provide a “Clear Cart” button.
- The cart page does not display an order total
    - The total appears on the Checkout: Overview page.”

Findings

- Quantity (QTY) UI elements appear editable but are not interactive.
- Ctrl-click does not open the cart page in a new tab. Ctrl-click works on other links on the site.
- Users can access the checkout page and complete an order with an empty cart.
- The description label on the cart page is unusually positioned.
- Sauce Labs Onesie’s product description contains a possible grammatical error: “hemmed sleeved” should be “hemmed sleeves.”
- Product-name hyperlink hover area extends beyond the displayed text, making text selection and copying more difficult.
- The cart page does not provide a “Clear Cart” button.
- The cart page does not display an order total. The order total is shown at Checkout: Overview.

Test Session Sheet 03 - CHECKOUT

Test Charter - Explore checkout behavior - focusing on *input validation* and *order completion*.

Timebox - 60 minutes

Session notes

- Refreshing the order confirmation page removes the “Generate PDF order” button.

- Checkout fields accept any nonblank input, including letters, special characters, and spaces.
- Can complete an order with an empty cart.
- Ctrl-click on the "Checkout" button - opens in the same tab.
    - Same with “Continue” and “Finish” buttons.
- Clicking a product name on the Checkout page opens its Product Detail Page (PDP), where the product can be removed from the cart.
    - The Checkout page does not provide a “Remove” button, unlike the Cart page.
    - The PDP has no on-page navigation back to Checkout; “Back to Products” returns to the PLP.
- From the checkout page, Cancel takes to the PLP (Home page).
- The order confirmation PDF uses the device’s date and time, even when the device’s clock is incorrect.
- Order completion PDF has “Items Description” label and only product names are listed, no product descriptions.

Findings
- Users can complete an order with an empty cart.
- The “Generate PDF order” button disappears after refreshing the order confirmation page.
- Checkout fields accept any nonempty input.
- Ctrl-click does not open “Checkout”, “Continue”, and “Finish” buttons in a new tab. Ctrl-click works on other links on the site.
- A product can be removed from the cart during checkout by opening its PDP and using the “Remove” button.
- Product Detail Page provides no direct way to return to Checkout; “Back to Products” returns to the PLP.
- Clicking the “Cancel” button returns the user to the PLP (Home page).
- The order confirmation PDF uses the device’s date and time, even when the device’s clock is incorrect.

Test Session Sheet 04 - SORTING

Test Charter - Explore product sorting behavior, focusing on *sorting options* and *sort order*.

Timebox - 30 minutes

Session notes
- Name sorting: The product naming convention is inconsistent.
    - All products begin with “Sauce Labs” except “Test.allTheThings() T-Shirt (Red).”
    - Only one product includes a color in its name.

- Name sorting provides limited benefit because most product names follow the same naming pattern - product names starting with “Sauce Labs”.
- Clicking a product’s detail page and returning back to PLP, the sort option resets to the default “Name (A to Z)” sort.
- Refresh resets the sort back to “Name (A to Z)”
- UI functionality: Clicking the down arrow on the sort dropdown does nothing - the rest of the box is clickable.
- These are sorting options, but there is a filter icon.
- A filter feature may be more useful than sorting for browsing products on an e-commerce site

Findings

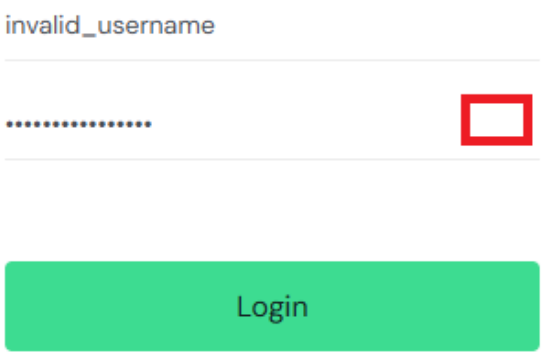

- Inconsistent product naming — “Test.allTheThings() T-Shirt (Red)” does not follow the “Sauce Labs” naming pattern, which may make it harder to locate when browsing products alphabetically.
- Sort selection resets when returning from a product’s details page.
- Sort selection resets after refresh.
- Clicking the down-arrow icon on the sort dropdown does not trigger the dropdown options.
- The sort dropdown displays a filter icon instead of a sort icon.

Bug Reports

This document contains bug reports for bugs discovered through test case and session-based exploratory testing.

Bug ID: BUG_LOGIN_001	
Field	**Details**
Title	No restriction on repeated invalid login attempts
Test session	Test Session Sheet 01 - LOGIN
Environment	Windows 11 Home - Desktop PC - Chrome
Steps to Reproduce	1. Enter a valid Username and an invalid Password. 2. Repeat indefinitely.
Expected Result	Login attempts are limited or blocked after excessive failed attempts.
Actual Result	Login attempts are not limited or blocked after excessive failed attempts.
Severity	Medium
Priority	High
Status	New
Evidence	BUG_LOGIN_001_Repeated_Invalid_Logi…

Bug ID: BUG_LOGIN_002	
Field	**Details**
Title	The password visibility icon becomes unavailable after an unsuccessful login attempt
Test session	Test Session Sheet 01 - LOGIN

Environment	Windows 11 Home - Desktop PC - Chrome
Steps to Reproduce	1. Enter invalid credentials in the Username and Password input fields. 2. Click the X within the error message.
Expected Result	The password visibility icon remains available after an unsuccessful login attempt.
Actual Result	The password visibility icon is unavailable after an unsuccessful login attempt.

Test Completion Report

This document summarizes test execution, results, and findings from the project's testing activities.

Test Summary

Testing covered login, shopping cart, checkout, and product sorting on SauceDemo. All 14 test cases were executed, with 13 passed and 1 failed. Exploratory testing identified 11 bugs, including issues with empty-cart checkout, checkout input validation, and login behavior. Testing was complicated by the lack of requirements and uncertainty about the demo site's intended behavior.

Test Results

Test Case Results	
Field	**Details**
Total test cases	14
Test cases executed	14
Passed	13
Failed	1

Exploratory Testing Results	
Field	**Details**
Completed sessions	4
Total session time	3.5 hrs
Bugs reported	11

BUG_SORT_011	Clicking the down-arrow icon on the sort dropdown does not open the dropdown options	Low	Low	New

Deviations from Plan

- Schedule delays: Testing activities took longer than planned.
- Scope deviation: The original scope included “Authentication.” Testing was limited to login functionality.

Outstanding Risks

- (BUG_LOGIN_001) Unlimited failed login attempts may increase exposure to brute-force attacks.
- (BUG_CHECKOUT_006) Users can complete orders with an empty cart, potentially creating invalid transactions.

- (BUG_CHECKOUT_008) Checkout accepts invalid customer information, potentially allowing orders with incorrect details.
- (BUG_CART_003) Users can proceed to checkout with an empty cart, potentially allowing invalid orders.

Lessons Learned

Test Planning

- Identify test case design techniques and exploratory testing approach during test planning.
- Improve schedule estimates and track planned versus actual dates to better manage testing timelines.
- Track revisions to the test plan to make deviations easier to identify and document.
- Research expected behavior and document assumptions when requirements or specifications are unavailable.
- Establish testing scope and expected behavior before testing when working with demo applications that lack requirements.

Test Case Design

- Improve test case coverage by identifying important scenarios, such as empty-cart checkout, during test design.
- Create test cases for important scenarios prior to discovering during exploratory testing, such as attempting checkout with an empty cart.

Test Execution

- Use the browser console to investigate JavaScript errors when unexpected behavior occurs.

Bug Reporting

- Finalize bug report order by severity and priority before naming evidence files to avoid renaming them later.
